

# CARING FOR YOUR

# QUARTZ COUNTERTOPS

# QUARTZ CARE

## General Cleaning

Mild dish soap & water are your friends! Use a mixture of the two for your general cleaning using a soft sponge or dishcloth. You can also use neutral countertop cleaners as well.

## Heat

Quartz is a heat-sensitive material.

Exercise caution with hot pans/pots on the surface as well as the usage of Air Fryers/Pressure Cookers/Crock Pots and any heat-generating appliance.

Use trivets/hot pads under hot items/appliances to prevent damage to your countertops.

## Oops!

Clean up your spills quickly to minimize spotting & stains.

## Stain Care

Stains can be stubborn!

Try- Liquid Bar Keeper's Friend/ Liquid Comet w/ Bleach. Apply with gentle pressure with your finger in a clockwise swirling motion.

Be careful not to push into the surface.

## Treatments

Technicians are available for cracks/chips or if your quartz.

Please contact us to schedule a service call to come out to fix!
